TALKING ABOUT LIMB LOSS

Information Sheet

This project aims to create a resource for patients with amputations – a booklet filled with lots of real life stories of different individuals and their experiences of limb loss and prosthesis use. This booklet will be given to new patients as well as being made available online.

We are looking for volunteers to participate in this project. You must be at least 18 years of age, have a lower limb amputation and be at least 6 months post amputation. We are looking for individuals with a variety of experiences of limb loss and prosthesis use. All information given will be fully anonymous but we will be using quotes from the interviews,

If you agree to participate in this study, you will be asked to take part in approximately an hour long one on one interview; this can be face to face or via telephone. The session will be recorded by an audio recorder.

The researchers are not aware of any risks associated with this study and you are free to withdraw consent at anytime without giving a reason.

If you have read and understood this information sheet and you would like to be a participant in the study, please now see the consent form. If you have any further questions please feel free to ask the researcher.
